**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rodgers in view of Bersonnet.

Rodgers discloses an elliptical trainer device having a pair of pivotal bars 48, a wheel 22, means for coupling the bars to the wheel, and a brake mechanism 26, and a switch control means 105 mounted proximal to the bars.

Bersonnet discloses a switch means which is mounted to the handle of an exercise apparatus. Given this teaching, it would have been obvious to one skilled in the art to mount the Rodgers switch to one of the handles of the bars for safety purposes.

Clearly, the Rodgers control console necessitates a driver circuit or control board to actuate the Rodgers brake 26; therefore, although not expressly stated, it would have been obvious to employ the necessary control circuit to utilize the brake means.

***Claim Objections***

3. Claims 1-5 are objected to because of the following informalities: In claim 1 line 4, --the—should be inserted after “by”. In line 6, “users” should be changed to --a user--. Appropriate correction is required.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
